Blackboard Learn

Delivering a delightful, world-class learning experience for all learners – anywhere at any time

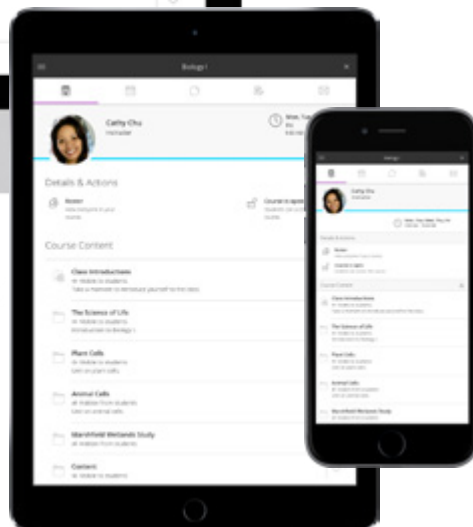

Blackboard has a new vision for learning – one that is unmatched in the industry. It's a vision for a learning experience that is centered on the learner and evolves as quickly as they do. It's a vision for fostering learner engagement, interaction and achievement through innovative technology, services, and data capabilities. It's a vision for reimagining learning as we know it.

It's this vision that is leading the development of a new learning experience.

What you can expect with the new Learn

The new Blackboard Learn provides a world-class learning experience that is personal, intuitive, connected, and always-on – meeting the ever-growing expectations of today's learners and teachers. We've made it easier than ever for teachers to adopt the technology and for learners to feel engaged and inspired from anywhere, at any time.

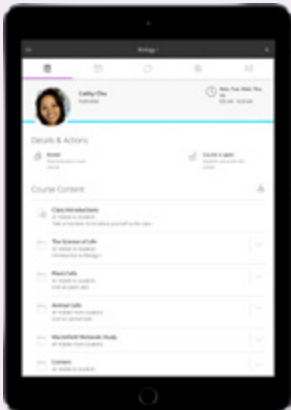

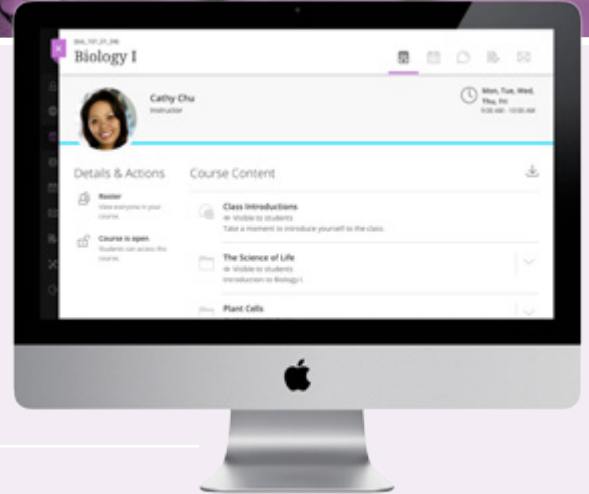

Enduring Quality & Innovation through SaaS Deployment

Continuous delivery of updates – including enhancements, fixes, and new, innovative features – ensures that students and teachers will always enjoy a high quality learning experience. And with small, frequent, painless updates, there is zero downtime and minimal change management.

World-class user experience & intuitive workflows

Blackboard has a new, completely redesigned user experience that features a simple, modern, intuitive, and consistent interface on any device - the Ultra experience. The Ultra experience - which districts have the option of enabling - provides easy navigation to everyday workflows, new ways to add engaging content, and a delightful experience.

Streamlined capabilities empower teachers to experiment and grow their use of technology in the classroom, driving adoption and resulting in more compelling learning experiences for students.

Easy and awesome on all devices

Students and teachers will now have access to all of their learning functionality on all devices, including tablets and smartphones. Enabled by a responsive design, this will ensure that students and teachers enjoy a great experience on all devices and screen sizes, and not lose the ability to perform any of the functions they require.

Additionally, our next generation native mobile solution, Bb Student, is specifically designed for students and gives them instant access to the information they need and the interaction they crave.

Extend your reach with Collaborate – Part of our Personalized Learning Solution

For schools who need to deliver more engaging, personalized and flexible learning options for students, the new Blackboard Collaborate is a fully redesigned web conferencing application. Collaborate is purpose-built for education and it's reliable, simple and convenient for teachers and students to be connected any time anywhere. Blackboard Collaborate is not just integrated, but rather NATIVE to our comprehensive digital learning environment.

Blackboard Learn is the powerful learning management system that serves as the foundation of our Personalized Learning Solution. With the Personalized Learning Solution, Blackboard provides an innovative, easy to use, comprehensive foundation for competency-based and personalized teaching and learning to power digital transformation that can grow with you as your digital learning needs evolve.
